References with Recommendations Letter

To:

**Women's Inter-Church Council of Canada,
47, Queen's Park Crescent East, Toronto, Ontario M5S 2C3.**

Dear Ladies of the Women's Inter-Church Council of Canada:

Warm greetings from Dr. Lynn Thiesmeyer, Professor of Environmental Information, Japan, and Vice-president of the Environmental Economic Research Institute, Myanmar. My specialization is rural development in Asia and in this capacity I began my relationship with A.W.A.R.E. Trust of India many years ago. I would like to recommend A.W.A.R.E., a Government-registered nonprofit organization, for funding and project support of their proposed income-generating project 'MICC'.

I am sending this letter on behalf of the Association for the Welfare Activities and Rural Education (AWARE) Trichy to confirm my continued support to AWARE India. I am an individual, working as a professor at a Japanese University and as a Research Institute director of Myanmar.

For over 10 years, I have supported AWARE each year with individual donations to help them carry out the projects of women's welfare and their children's rural education, including HIV⁺-positive children. I intend to continue my donations on a permanent basis.

My trainees and my University students had visited and assisted at AWARE TRUST projects on various occasions in Tamil Nadu, India. We strongly feel that their proposed Women MPCS promotion project is an appropriate income-generation for the poor rural farming community in Manikandam block in Trichirapalli District of Tamilnadu, India. Hence, I have great pleasure in submitting to the WICC this letter of reference on behalf of the Association for Welfare Activities and Rural Education (AWARE). I would be very grateful if you could give their MICC proposal your most serious consideration.

Yours sincerely,

To : UN WOMEN
UN Trust Fund to End Violence against Women

Geneva, 16/01/2022

To Whom It May Concern,

As the President of Aware Suisse, a Geneva-based NGO, I would like to recommend AWARE TRUST INDIA for the project submitted to UNTF "Integrated Women Emancipation at Ramanathapuram, India" on a 3 years duration.

Through this project, AWARE will work among the marginalized communities in Ramna District specially among the fishermen communities and landless/daliths in the inland. The main result is that women and girls from the targeted community have access to health and education in a violence-free society.

Our non-profit organization would like to recommend AWARE for this project. We have worked with them for the past 20 years. Still today we are funding Women Development Project in Trichy and Ramanathapuram. We trust AWARE for respecting deadlines and conditions of our donors. We also trust their commitment for gender equality, as it is run mainly by women and the majority of Trustees, employees, members and all beneficiaries have been women.

I sincerely hope you will take into consideration their candidacy for this funding and we remain open for any further contact if necessary.

Best regards,

Aurélie Krummenacher

Letter of Recommendation

The non-profit organization Aware Trust India has been supported for the past twenty-five years by Aware Suisse. Our Geneva-based organization has worked upstream to support the Indian team with funds, expertise and consultancy to conduct highly efficient last-mile projects in rural India.

Aware Trust India is specialized in delivering tools for progress wherever no other bigger organization have a reach. The team is very dedicated with a significant number of volunteers. Their dedication to the rural-poor in South India, with a genuine enthusiasm and commitment, has been outstanding all these years.

Every two-years we do a complete financial and organizational audit, to match our accounting and improve the monitoring system of all our projects. Furthermore, regular updates and close follow up of the projects allow us to assess the impact on a regular basis.

We highly recommend Aware Trust India for this two-years project on Solar Irrigation for Agricultural Resilience. Solar pumps are strongly needed in this dry area and we hope that this will further establish the mission of creating livelihood in this drought-affected area.

Always eager to share more information on our activities, please feel free to contact us for further details.

Sincerely,

Aurélie Krummenacher

To the International Water Institute, Solar Irrigation for Agricultural Resilience Fund:

I am writing to recommend the project proposed by the non-profit Association for Welfare Activities and Rural Education (A.W.A.R.E.) of Tamil Nadu, India, for Solar Irrigation for 500 rural families in Ramanathapuram District, Kadaladi Block. The director, Mr. U. Boopathy, has been known to me for over 15 years. I have supported A.W.A.R.E. each year with donations to help with disaster relief activities, poverty reduction, women's welfare and their children's rural education, including that of HIV+ Positive children. I have also sent trainees from Japan for internships at A.W.A.R.E., where they were welcomed and enabled to participate in every aspect of the association's activities.

My field is sustainable development in Asia and I have worked mainly in Southeast and East Asian rural communities, identifying threats to food-producing land and water.

From this standpoint I strongly recommend AWARE's proposal for a 2-year project on Solar Irrigation for Agricultural Resilience. This project, which seeks to provide the means for better agricultural outputs in the very dry, very poor Kadiladisubdistrict, has the potential to mitigate the effects of worsening climate and dry, clay soil at a lower cost and more sustainably.

The entire area, which is coastal and rural, is dependent on agriculture for 70% of its income despite its climate being semi-arid with frequently occurring droughts. The current agricultural situation obviously means a food gap in a community where extreme poverty already hampers access to basic needs. The Kadiladi block (subdistrict) of the Ramanathapuram District ranks in the bottom 2 out of 11 subdistricts in its Human Development Index. It ranks in the bottom 3 in the Child Development Index and is the lowest-ranked in the Multidimensional Poverty Index. Women and children perform most of the agricultural labor while men have usually migrated internally to find day labor. The arrival of COVID-19 has made an unfortunate situation worse, as men cannot easily find town-based jobs and more children have dropped out of school.

Photovoltaic pumps to access groundwater are at this point one of the most sustainable ways to mitigate drought and low precipitation in an area without other financial means to subsist. By reducing the cost burden of energy inputs the POV pumps will allow the Kadiladicultivators to produce food and some income without the burden of added debt. Further, the project can prove to be a model for similar communities. The proposed implementation period of 2 years is feasible, with the earliest-built POV equipment and water tanks to serve in confirming or enhancing the functioning of those units being built throughout the period.

It is with great pleasure that I highly recommend this tirelessly working, human-focussed Association's proposal for solar irrigation for 500 households in Kadiladi of Ramanathapuram District, Tamil Nadu.

Yours sincerely,

Dr. Lynn J. Thiesmeyer
